

**SUMMER
SPRINGBOARD**
Look Inward. Go Upward.

Neuroscience Infosheet

New student admissions for
Summer 2023 are open.

Program Highlights

- Gain exposure to live brain activity recordings
- Participate in various lectures on sensory processing, neuropathology, brain and spinal cord anatomy, and more
- Engage in interactive workshops and learn basic lab techniques in molecular neurobiology, neurophysiology and neuroanatomy
- Examine and debate current ethical dilemmas within the neuroscience field.

2023 Dates

Boston

- Session 2: July 09 - July 21

Academic Program Overview

Curious about the brain? Want to discover and learn the fundamentals of brain biology and the functioning of the central nervous system? By attending the Neuroscience Summer Springboard course students will be able to explore and familiarize themselves with perception, decision-making, neuroethics, neurotechnology, and many other topics. Learn how the development of the brain affects emotions, physiology, and cognition, as well as develop a foundation for future study paths and careers in medicine, biology, biomedical science, psychology, and more. This course is an excellent choice for students who have taken AP Psychology or Summer Springboard's Psychology & Neuroscience course.

Excursions

- Students will have the opportunity to visit an fMRI Lab to see how brain scans work.
- Past excursions have included visits to TMS and biofeedback professionals

Instructors

Boston - TBA

Courses are taught by accomplished and passionate faculty recruited from many area colleges, universities and professional forums. Each faculty member is selected for their subject area expertise and proven ability to both challenge and captivate students.

Tuition Information:

Residential Students:

- Includes: all meals, lodging, excursions, academic course, weekend excursions
- Excludes: optional airport pickup and drop off service (available for an additional fee)
