Summer 2024 are open.

Program Highlights

- Gain a fundamental understanding of the structure and function the basic anatomy and physiology of animals
- Provided information about different career paths within veterinary medicine
- Become familiarized with common diseases affecting animals, their causes, symptoms, and basic diagnostic methods and general animal health
- Introduced to fundamental veterinary procedures and general terminology

2024 Dates

Duke University

- Session 1: June 30 - July 12

Academic Program Overview

Are you ready to apply your love and compassion for animals to learning? In this Veterinary Medicine course you will learn about the growing and diverse career opportunities within the field from a well-rounded and professionally experienced Vet Med student. Students will gain an overview of the field, including its history, scope, and significance in animal healthcare. Students will leave with a better understanding of the field, which will be helpful due to its competitive market and few med schools in the US.

Excursions

TBA

Instructors

Miranda Griffin

Miranda Griffin is a dedicated and motivated veterinary medicine student with a passion for surgery. With a solid foundation in animal sciences, Miranda is currently a second year Doctor of Veterinary Medicine (DVM) at North Carolina State University- College of Veterinary Medicine, graduating in 2026. Miranda is excited to bring her exposure of the vet med track to students and familiarize them with the various tracks possible within veterinary medicine.
